

## RECLAIMED HAND HEWN BEAMS

Grade | Rustic

Species | Mixed Hardwoods only

Dimensions | Nominal 6x6 8x8 10x10 12x12

Lengths | Average 10-25'

Structure | Solid or Box

Milling Options | Resawn or Sanded 1-4 sides

\*Standard Preparation of reclaimed beams includes removal of loose debris, removal of raised and exposed face nails, and bug treatment.

Original hand hewn beams are rugged and riddled with history. They were shaped many generations ago by farmers using just an adze and an axe. These once structural elements were shaped from felled trees by hand to make sturdy frames that were pegged together for barns, homes, and other facilities. The extreme character of these beams should be welcomed and admired.

Made in America.

CHECKING

### RESAWN

Beam is removed of its original surface and is left with a new surface and perpendicular rough saw marks.

### SANDED

After resawing, the new surface's saw marks are sanded down to a smooth, soft, clean surface.
